Other Skills

- Team Leadership.
- SCRUM.
- Git.
- Advanced use of linux systems.
- Entrepreneur Spirit
- Web Hosting.

Projects

<http://augustolembale.com/projects>

BTC-Payments - NodeJs + ExpressJS + MongoDB + AngularJS + Bitcore + Blockr API - In Development

An NPM module to easily configure and integrate a BTC payments processor into nodejs, using a hierarchical deterministic addresses you will receive all your payments on a single address. You will also dont need the bitcoin blockchain to push text, so it's very lightweight and you can use the testnet network for testing.

BTC-Price - NodeJs + MongoDB - In Development

An NPM module that allows you to get the btc price of the biggest exchanges and save them.

Logger - NodeJs - In Development

An NPM module that allows you to print custom output messages.

Cryptpuse - NodeJs + ExpressJS + MongoDB + AngularJS + Bitcore + Blockr API - *Suspended*

CryptUse is a public and free web platform for people, commerces and foundations that use Bitcoin and other cryptocurrencies.

With one single account, you can use the three services we provide:

Searching, trading and shopping; thus having a centralized solution for all your cryptocurrency needs, and always keeping possession over them.

You will be able to find users and see their public profile, including social networks, personal information, what they're offering or looking for; and trade money or products with them, all of this using cryptocurrencies.

Thanks to our mediation system, all trades between users will still be completely peer-to-peer. And, if a problem arises or the negotiations fails, we make sure your money is returned to you.

And every action, like selling or buying, will affect your and other users' "karma" rating, promoting the good behaviour in the platform.

Cryptsy Bender - Java + Cryptsy API - *Finished* [BitcoinTalk Forum](#)

A BTC trading bot that uses simple trading algorithms and works over the exchange cryptsy.com.

MCXNow BOT - Java + MCXNow API - *Finished* [BitcoinTalk Forum](#)

A BTC trading bot that uses simple trading algorithms and works over the exchange mcxnow.com.

Languages

- Spanish (Native).
- English (Fluent), FIRST Certificate of Cambridge International University.
